RE: **Generator Load Bank Testing**

Generator Load Bank Testing

Friday, April 10th

Generator load bank testing is scheduled for Friday April 10th from 7am to 5pm. During this time frame, the generator will run for approximately four hours. Building Engineers will be monitoring the HVAC system throughout the test. Depending on wind conditions, it may be necessary to temporarily close the outside air dampers on the main air handlers to help prevent exhaust odor from entering the building. Other than the potential noise of the generator while it is running, this is not expected to have a significant impact on tenant comfort.

Please also note the following temporary access impacts on the day of testing:

- The sidewalk along the loading dock will be closed to all traffic as a safety precaution due to electrical cords connecting the test equipment to the generator.
- Three parking spaces along 73rd Avenue next to the generator will be coned off to accommodate the required testing equipment.

Your patience and cooperation during this maintenance is appreciated.

If you have any questions or concerns, please contact your agency representative at the following address:

- For DOC email DOCHQmanagementservices@doc1.wa.gov
- For WSDOT email HQFacilitiesHelpDesk@wsdot.wa.gov

This bulletin and other recent bulletins can be found posted on the ELG Building website at www.elgbuilding.com.
